

Aputure Lantern

Light Up the Room

Aputure’s Chip-on-Board LEDs shine because of their versatility, and ability to create hard or soft light simply by using different lighting modifiers. With the recent release of the Fresnel 2X and the Spotlight Mount, for intensifying and shaping hard light, we decided it was time to introduce an easier way to shape your soft light too.

Even, Omnidirectional Light

By utilizing a 26” spherical design, the Lantern spreads the light from your LED or Studio Strobe in all directions with a 270° beam angle. Now you can fill an entire space with soft, even light with just a single light source.

The Art of Control

The Aputure Lantern is one of the only spherical softboxes on the market with a 4-section fully adjustable light control skirt. By using a hook-and-loop design, the removable skirts can attach in any position, to quickly and precisely control your soft light. You can roll the skirt up or down to flag off unwanted light.

Specification

Product Unfold Dimension	650x650x560mm/25.5x25.5x22"
Product Collapsed Dimension	180x180x810mm/7x7x32"
Box Dimension	185x185x835mm/7.3x7.3x32.9"
Weight	2.76kg/6.09lbs
Diffusion Stops	1-stop

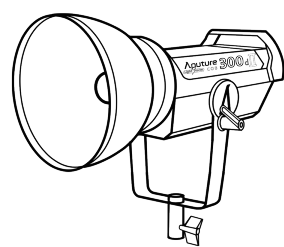

For Run-and-Gun Filmmakers

With its tension-based quick release design, the Lantern can be set up or broken down in just a few seconds, allowing you to set up fewer lights, faster. Combining that with its durable and portable design makes the Lantern the perfect run-and-gun soft light modifier.

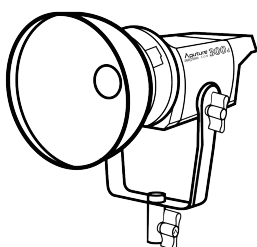

Any Bowens Mount Light

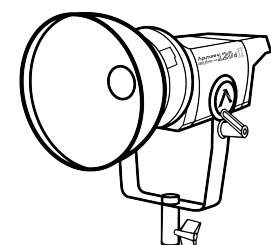

With the ability to fit onto any Bowens mount Studio Strobe or LED fixtures, such as our 120d or 300d series lights, the Lantern is the perfect photo or video accessory for casting soft light over a wide area, while still maintaining control.
